STAT

Mr. Wattles --

Per your request, [redacted] phoned to give you the following comments:

"OTR has no objection but notes that it is an ambitious program which would take a very long time to implement and would require constant strong support from the highest levels of the Agency.

"I should remind you that Mr. Colby has made it clear that we need fewer training courses not more and that he has indicated a desire for us to include more training of a management nature or "leadership", as he has described it, in our more popular courses -- for example, the Midcareer Course."
